## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to. The abstract contains claim style form and legalistic jargon. The abstract should communicate the gist of an invention in simple concrete terms, and short readable sentences, so as to enable a reader to quickly ascertain the document's relevancy. Correction is required. See M.P.E.P. § 608.01(b).

2. The disclosure is objected to because of the following informalities: element numbers and feature(s) are inconsistently related. For example, page 8 indicates two different feature(s) as element 52.

Appropriate correction is required.

### ***Drawings***

3. The subject matter of this application admits of illustration by a new drawing to facilitate understanding of the invention. Applicant is required to furnish a new drawing under 37 CFR 1.81(c). No new matter may be introduced in the required new drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

The guide plate & it's associated slots have not been adequately depicted. The examiner suggests a perspective view.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 3651

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification fails to teach(es) one skilled in the art precisely how an object(s) transfers from the first segment to the second.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regard to claim(s) 1, line(s) 1 & 4, what is the relationship between these tracks?

Further, claim(s) 5 has a typo.

### ***Conclusion***

8. The applicant is to note the following. The applicant is not to take failure by the examiner to apply an art rejection as an indication of allowable subject matter.
